

My family PAYS FOR not just one, but three XM satellite radio accounts, and we listen to it daily. Traffic and weather is not yet available in my area, but I am looking forward to the time when it is. I listen to XM because I can hear music that I really want to listen to that I can't hear on commercial radio. I have to switch from station to station while driving to work to hear traffic reports, but I am not actually listening to the stations because I don't care for most of the music played on commercial radio. I pay for the privilege of receiving satellite radio, and the NAB should not tell me what I can and cannot listen to. I want the instant traffic and weather!
